

Safe & compassionate care,
every time

Welcome to the division of integrated medicine

We believe that medical nursing offers endless opportunities. At one end of the scale we have the unstable nature of acute conditions where the patient can deteriorate at any time and your ability to monitor clinical signs and respond to emergencies is vital. At the other end of the scale there are areas of practice, in one of our acute or community hospitals or in the patient's home, where your ability to get to know an individual and help them with their long-term health condition really makes a difference. Palliative care and rehabilitation skills are also challenging but rewarding areas of practice.

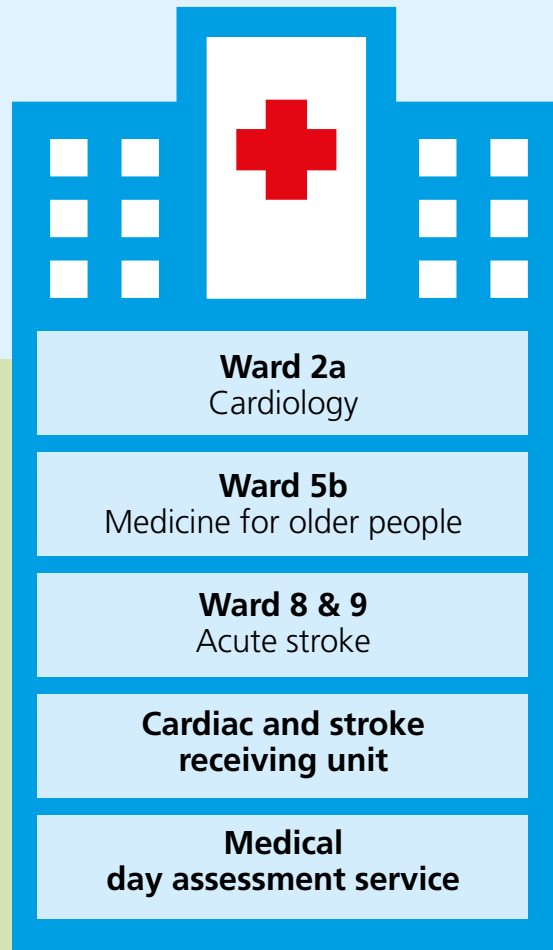

Whatever your preference, in medical nursing every day will be different. You will be a member of a multi-disciplinary team working together to plan and deliver patient care.

We know that to provide safe and compassionate care we need to recruit and invest in the best staff. Our division is energetic and embraces new ways of working and we strive for excellence in all that we do.
