

Safe & compassionate care,
every time

Welcome to the division of surgery and critical care

We provide outpatient and inpatient services for all core surgical specialties for the local population of Buckinghamshire, with regional services in specialist spinal surgery and burns care. We are an ambitious division that strives for excellence in all our services and one that believes continuous quality improvement should be at the heart of everything we do.

We are as passionate about developing our teams as we are about the patient care we deliver. Nursing in the division of surgery and critical care gives experience in a broad range of surgical specialities. In the near future we will be able to provide you with an 18-month rotational programme that is modelled on the patient pathway so you gain experience on our surgical assessment unit, acute surgical ward and critical care ward.

Throughout our division you will be working as part of a dedicated team, working alongside our medical and allied health professional colleagues. We are lucky to have our medical team actively involved in working with all our staff to develop their skills. Clinical supervision is

embedded across the division for all levels of staff and we are committed to working with you to develop bespoke training and development plans so you can develop your career in the way you want. We also encourage our nurses to embark on NHS leadership programmes and welcome and support academic ambitions.
