IMPLICATIONS AND ISSUES TO WHICH THE PAPER RELATES (PLEASE MARK IN BOLD)

<i>Patient Quality</i>	<i>Financial Performance</i>	<i>Operational Performance</i>	Strategy	<i>Workforce performance</i>	<i>New or elevated risk</i>
<i>Legal</i>	<i>Regulatory/ Compliance</i>	<i>Public Engagement /Reputation</i>	<i>Equality & Diversity</i>	<i>Partnership Working</i>	<i>Information Technology / Property Services</i>

ANNUAL OBJECTIVE

Integrated Care

Enhance partnerships between community services, primary health, social care, voluntary sector partners and patients to better support care in people's homes and in other community settings.

Please summarise the potential benefit or value arising from this paper:

RISK

Are there any the specific risks associated with this paper? If so, please summarise here.

Non-Financial Risk:

BAF 5.1a There is a risk that if we do not enhance partnerships between various stakeholders that we will not deliver the best support to patients in their homes and other community settings.

BAF 5.1c If we do not lead and drive an integrated primary acute care system (PACS) in Buckinghamshire we will not optimise the benefits from joined up working e.g. reducing fragmentation and duplication of services for patients.

BAF 7a If we do not redesign our musculo-skeletal services with our partners there is a risk the that service will be competitively tendered. If this happens and we are not successful in bidding for the tender it is possible that we would lose control of the provision of secondary care MSK services (risk to recruitment, patient care and finance)

	<i>Financial Risk:</i>
