

HOW TO TIE A TIE

Four in Hand Knot method

The **Four In Hand** is the most popular tying method, probably due to its simplicity. It looks elegant & “cool” altogether and it will be great for almost every event. The Four In Hand is a little bit asymmetric tying knot, and forms a relatively small knot. Therefore, this tying method will be great for a narrow collar opening, and for medium-large thickness fabrics. For that reason the Four In Hand isn’t usually the best choice with a wide collar shirts. The Four In Hand, due to its simplicity, leave a relatively long in length tie.

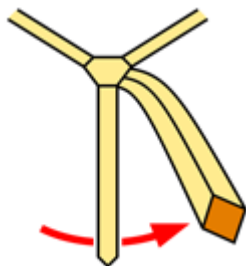

Step 1

Place the tie on your neck so the wide end of the tie will be on the left and the narrow end at the right. place the tie so the wide end will be longer than the narrow end (about 10 inches longer).

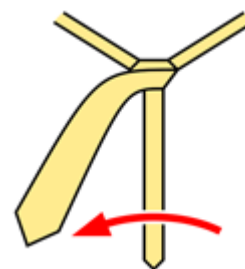

Step 2

Bring the wide end of the tie across the narrow end, above it, to the right.

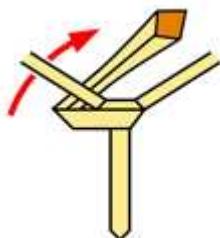

Step 3

Bring the wide end of the tie across the narrow end again, underneath it, to the left.

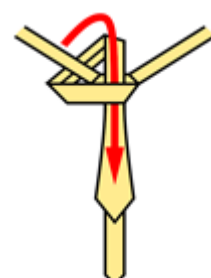

Step 4

Turn the wide end of the tie to the right, across the narrow end, above it.

Step 5

Pass the wide end below the part of the tie around your neck, upwards.

Step 6

Pass the wide end of the tie down, inside the loop which created the last step. Finally, tighten the tie around your neck.

Congratulations!

You successfully tied your tie with the Four In Hand tying method!
Keep practicing the Four In Hand to get it memorized and tie it a lot faster.
